

Design Technology Progression of Knowledge and Skills Map School Curriculum – statements which are additional to the programmes of study for D&T are shown in purple italic font

	DT Framework	EYFS (KS1 readiness objectives)	By the end of KS1 children should be able:	By the end of KS2 children should be able:
Designing	Understanding contexts, users and purposes	 To describe something they want to make, build and construct To say who they are making, building and constructing for To talk about what materials they are going to use when making, building and constructing 	 Across K\$1 pupils should: work confidently within a range of contexts, such as imaginary, story-based, home, school, gardens, playgrounds, local community, industry and the wider environment state what products they are designing and making say whether their products are for themselves or other users describe what their products are for say how their products will work say how they will make their products suitable for their intended users use simple design criteria to help develop their ideas 	Across KS2 pupils should: • work confidently within a range of contexts, such as the home, school, leisure, culture, enterprise, industry and the wider environment • describe the purpose of their products • indicate the design features of their products that will appeal to intended users • explain how particular parts of their products work In early KS2 pupils should also: • gather information about the needs and wants of particular individuals and groups • develop their own design criteria and use these to inform their ideas In late KS2 pupils should also: carry out research, using surveys, interviews, questionnaires and web-based resources • identify the needs, wants, preferences and values of particular individuals and groups • develop a simple design specification to guide their thinking

	Generating, developing, modelling and communicating ideas		 Across KS1 pupils should: generate ideas by drawing on their own experiences use knowledge of existing products to help come up with ideas develop and communicate ideas by talking and drawing model ideas by exploring materials, components and construction kits and by making templates and mock- ups use information and communication technology, where appropriate, to develop and communicate their ideas 	Across KS2 pupils should: • share and clarify ideas through discussion • model their ideas using prototypes and pattern pieces • use annotated sketches, cross-sectional drawings and exploded diagrams to develop and communicate their ideas • use computer-aided design to develop and communicate their ideas In early KS2 pupils should also: • generate realistic ideas, focusing on the needs of the user • make design decisions that take account of the availability of resources In late KS2 pupils should also: • generate innovative ideas, drawing on research • make design decisions that take account of the availability of resources
Making	Planning	 To make, build and construct objects using a variety of materials To join materials together when making, building and constructing 	Across K\$1 pupils should: • plan by suggesting what to do next • select from a range of tools and equipment, explaining their choices • select from a range of materials and components according to their characteristics	 make design decisions, taking account of constraints such as time, resources and cost Across KS2 pupils should: select tools and equipment suitable for the task explain their choice of tools and equipment in relation to the skills and techniques they will be using select materials and components suitable for the task explain their choice of materials and components according to functional properties and aesthetic qualities In early KS2 pupils should also: order the main stages of making In late KS2 pupils should also: produce appropriate lists of tools, equipment and materials that they need formulate step-by-step plans as a guide to making

			Across KS2 pupils should:
		,	 follow procedures for safety and hygiene
techniques			• use a wider range of materials and components
			than KS1, including construction materials
			and kits, textiles, food ingredients, mechanical
			components and electrical components
		. 0	
			In early KS2 pupils should also:
		 measure, mark out, cut and 	 measure, mark out, cut and shape materials and
		shape materials and	components with some accuracy
		components	 assemble, join and combine materials and
		 assemble, join and combine 	components with some accuracy
		materials and components	 apply a range of finishing techniques, including
		 use finishing techniques, 	those from art and design, with some
		including those from art and	accurately assemble, join and combine materials
		design	and components
		-	 accurately apply a range of finishing techniques,
			including those from art and design
			 use techniques that involve a number of steps
			 demonstrate resourcefulness when tackling
			practical problems
			accuracy
			In late KS2 pupils should also:
			 accurately measure, mark out, cut and shape
			materials and components
Own ideas and	To talk about their constructions / products, and	Across KS1 pupils should:	Across KS2 pupils should:
products	what they are pleased with	 talk about their design ideas 	• identify the strengths and areas for development in
		and what they are making	their ideas and products
	could be even better	make simple judgements	 consider the views of others, including intended
	 To talk about everyday objects that they like 	about their products and ideas	users, to improve their work
	and say why they are good	against design criteria	
		 suggest how their products 	In early KS2 pupils should also:
		could be improved	 refer to their design criteria as they design and
			make
			 use their design criteria to evaluate their
			completed products
			In late KS2 pupils should also:
			 critically evaluate the quality of the design,
			manufacture and fitness for purpose of their
			products as they design and make
			evaluate their ideas and products against their
			original design specification
		skills and techniques Own ideas and products • To talk about their constructions / products, and what they are pleased with • To talk about their constructions and say how it could be even better • To talk about everyday objects that they like	skills and techniques • follow procedures for safety and hygiene use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components own ideas and products • To talk about their constructions / products, and what they are pleased with • To talk about their constructions and say how it could be even better • Across K\$1 pupils should: • talk about their design ideas and what they are pleased with • To talk about their constructions and say how it could be even better

Existing products	Across KS1 pupils should explore: • what products are • who products are for • how products work • how products work • how products are used • where products might be used • what materials products are made from • what they like and dislike about Products	Across KS2 pupils should investigate and analyse: • how well products have been designed • how well products have been made • why materials have been chosen • what methods of construction have been used • how well products work • how well products achieve their purposes • how well products meet user needs and wants In early KS2 pupils should also investigate and analyse: • who designed and made the products • where products were designed and made • when products were designed and made • whether products can be recycled or reused In late KS2 pupils should also investigate and analyse: • how much products cost to make • how innovative products are • how sustainable the materials in products are • what impact products have beyond their intended purpose
Key events and individuals	Not a requirement in KS1 Across KS2 pupils should know: • about inventors, designers, engineers, chefs and manufacturers who have developed ground-breaking products	

-				
Technical Knowledge (Structures)	Making products work	 To build / construct structures from a range of materials to a design brief that they have created or been given. To build/ construct structures that are tall or strong. To know that tape and glue can join materials together and can make structures stronger. 	Across KS1 pupils should know: • about the simple working characteristics of materials and components • about the movement of simple mechanisms such as levers, sliders, wheels and axles • how freestanding structures can be made stronger, stiffer and more stable • that a 3-D textiles product can be assembled from two identical fabric shapes • that food ingredients should be combined according to their sensory characteristics • the correct technical vocabulary for the projects they are undertaking	 Across KS2 pupils should know: how to use learning from science to help design and make products that work how to use learning from mathematics to help design and make products that work that materials have both functional properties and aesthetic qualities that materials can be combined and mixed to create more useful characteristics that mechanical and electrical systems have an input, process and output the correct technical vocabulary for the projects they are undertaking In early KS2 pupils should also know: how mechanical systems such as levers and linkages or pneumatic systems create movement how to program a computer to control their products how to make strong, stiff shell structures that a single fabric shape can be used to make a 3D textiles product In late KS2 pupils should also know: how mechanical systems such as cams or pulleys or gears create movement how to make strong, stiff shell structures that a single fabric shape can be used to make a 3D textiles product how more complex electrical circuitsand components can be used to create functional products how to program a computer to control their products how to program a computer to as cams or pulleys or gears create movement how more complex electrical circuitsand components can be used to create functional products how to program a computer to monitor changes in the environment and control their products how to reinforce and strengthen a 3D framework that a 3D textiles product can be made from a motion changes in the environment and control their products
				products how to reinforce and strengthen a 3D framework

king and utrition	Where food comes from	Across KS1 pupils should know: • that all food comes from plants or animals • that food has to be farmed, grown elsewhere (e.g. home) or caught	Across KS2 pupils should know: • that food is grown (such as tomatoes, wheat and potatoes), reared (such as pigs, chickens and cattle) and caught (such as fish) in the UK, Europe and the wider world In late KS2 pupils should also know: • that seasons may affect the food available
Cooki Nuti			

Food preparation,	To recognise different foods as either healthy or unhealthy	Across KS1 pupils should know: • how to name and sort foods	
cooking and	To know how to use basic cutlery and	into the five groups in The	
nutrition	utensils to make and eat food	eatwell platethat everyone should eat at	
	 To follow simple instructions to make different foods 	 Inat everyone should eat at least five portions of fruit and 	
	 To know when we make food for other 	vegetables every day	
	people that it needs to be appealing.	 how to prepare simple dishes 	
		safely and hygienically, without	
		using a heat source	
		 how to use techniques such as 	
		cutting, peeling and grating	
		Across KS2 pupils should know:	
		 how to prepare and cook a variety of 	
		predominantly savoury dishes safely and	
		hygienically	
		including, where appropriate, the use of a	
		heat source	
		• how to use a range of techniques such	
		as peeling, chopping, slicing, grating, mixing,	
		spreading, kneading and baking	
		In early KS2 pupils should also know:	
		 that a healthy diet is made up from a 	
		variety and balance of different food and	
		drink, as	
		depicted in The eatwell plate	
		• that to be active and healthy, food and	
		drink are needed to provide energy for	
		the body	
		In late KS2 pupils should also know:	
		 that recipes can be adapted to change 	
		the appearance, taste, texture and	
		aroma	
		• that different food and drink contain	
		different substances – nutrients, water and	
		fibre – that	
		are needed for health
