

## Zog and the Flying Doctors

Meet the Flying Doctors, a dragon, a knight and a girl. Their names are Zog, Gadabout the Great and Princess Pearl. They help animals when they are sick. Zog is good at flying but not so good at landing.

One morning they saw a mermaid with sunburn. The doctors gave her some cream and a hat. Next, the doctors saw a unicorn with an extra horn. They cut it off very gently.

In the afternoon, they saw a lion with the flu. The doctors gave him a tablet to make him feel better. In the evening, Zog, Sir Gadabout and Princess Pearl went to Pearl's Uncle's castle. The King was not happy. He wanted her to be a princess not a doctor! He locked her in a turret and told her to sew cushions and arrange pretty flowers.

The King became ill but the other doctors didn't know what was wrong. Pearl said he had Orange Fever and to make him better you need some unicorn horn, a lion's sneeze, mermaid scales, a little slime and some cheese.

Zog and Sir Gadabout collected all of the things and gave them to Pearl so she could make a special medicine. Pearl gave the medicine to her Uncle, the King. He got better and then apologised to Pearl and set her free.

The Flying Doctors flew off into the sunset!
